A few hot items:

From the Federation website:

Benny Begin, Israeli Cabinet Minister and son of former Likud Prime Minister Menachem Begin, is an Israeli geologist and politician. Begin was first elected in 1988 as a Likud Knesset member and served as Science Minister under Prime Minister Netanyahu until he resigned from his position in 1997 to protest against the Hebron Agreement. In 1999, he left the Knesset and politics altogether. He resumed his career in science and education and was appointed Director of the Geological Survey of Israel. On November 2, 2008, Begin announced his return to politics, and to the Likud party, and won a seat in the Knesset in the 2009 election.

New Fall Campaigns!

I am in the process of building a campaign for the new school year, for both high schools and campuses. If you want to know what it is, come to the Betar meetings!
